

WE'RE IT SECURITY EXPERTS

Don't just take our word for it.

At Oceanova, we needed to make sure our IT and Security could support our growth plans, and Cyan understood that a Security Assessment would help us achieve that. Their investigation into our systems, processes, and people was thorough and exceeded our expectations.

The report that Cyan produced for us highlighted which elements of our systems and processes were already fit for purpose, and clearly communicated where and how we needed to improve to reduce our risk.

We couldn't have asked for more from Cyan. They've spoken in our language, explained everything clearly, and have proved to be the security experts they say they are. We've built a great relationship with them and would definitely recommend them to other growing businesses.
